Re: Application for Web Developer position

Dear Hiring Manager:

I am Nicolas Cervantes, a Web Developer passionate about creating software solutions. With 5+ years of progressive experience in different technologies like WordPress, Laravel, PHP, Drupal, Javascript, ReactJS, and MySQL. I'm highly interested in this opportunity because I'd make a great fit for your company.

I realize you're looking for a candidate with web development skills. As a Software Developer and Programmer Analyst, I have been responsible for developing important projects, building them from scratch, converting PSD, Figma, Figma or Illustrator designs into functional and cross-browser websites.

During the second half of 2022, I solved diverse issues and migrated <https://harbourair.com/> web application to a new hosting platform. It is a site that reports between 15.000 - 20.000 daily visits, which implies a big responsibility. I want to highlight that I fixed a critical issue generated by API changes that weren't announced and affected the Flight Scheduler, which is a key component of the business flow. During the first half of this year I developed some features for <https://cpanel.net/>.

With the combination of my web development and leadership skills, I'm confident I'd make a great fit for this position. Thank you for taking the time to review my application and consider me as a candidate. I look forward to hearing from you soon!

Nicolas Cervantes
